SUJIN SABU

Cybersecurity Professional | SOC Analyst | CompTIA Security+ ce | OCSP Certified
+91 9747886284 | sujinsabu2617@gmail.com | linkedin.com/in/sujin-sabu-671392229
Portfolio: https://sujinsabu.github.io/portfolio/ | Kollam, Kerala, India

PROFESSIONAL SUMMARY

Results-driven Cybersecurity Professional & SOC Analyst with a strong foundation in Computer Science Engineering and hands-on expertise in enterprise security monitoring, threat detection, and incident triage. Proven capability in architecting production-grade SIEM environments (Splunk, Wazuh, ELK Stack), deploying universal forwarders, and constructing custom correlation rules mapped to the MITRE ATT&CK framework. Experienced in integrating threat intelligence feeds, performing log forensics, and leveraging Python for security automation to proactively defend critical infrastructure.

CORE COMPETENCIES

SIEM & Monitoring: Splunk Enterprise, Wazuh, ELK Stack, Universal Forwarder, Log Parsing, Ingestion, Event Normalization
Threat Detection & IR: MITRE ATT&CK Framework, Attack Pattern Analysis (Brute-Force, C2), IOC Triage, Threat Intel (VirusTotal, AbuseIPDB)
Network & System Security: TCP/IP, DNS, Firewalls, IDS/IPS, Active Directory, Linux/Unix & Windows Internals, Vulnerability Assessment
Tools & Platforms: Splunk, Wazuh, ELK, Wireshark, Nmap, Burp Suite, Metasploit, Kali Linux, LetsDefend, TryHackMe, BTLO
Automation & Scripting: Python (Security Scripting, REST APIs, Log Automation), Bash, PowerShell

SECURITY ENGINEERING & PROJECTS

Production-Grade Enterprise SOC & SIEM Lab | *Splunk, Wazuh, Linux, MITRE ATT&CK*

• Architected and managed a virtual SOC monitoring environment on an Ubuntu Server backbone with multi-OS telemetry.

• Configured Splunk Enterprise and Universal Forwarders to parse and normalize syslog, Windows Event Logs, and firewall events.

• Simulated adversary tactics (SSH brute-force, privilege escalation) and created custom SPL alerts mapped to MITRE ATT&CK (T1110).

• Integrated automated threat intelligence enrichment leveraging VirusTotal and AbuseIPDB REST APIs for fast IOC triage.

PhishGuard+ — AI-Driven Phishing Threat Detection Engine | *Python, Machine Learning, Threat Intel*

• Developed an automated machine learning detection system for phishing URLs and email payloads, achieving 91.5% accuracy.

• Engineered Python preprocessing pipelines extracting URL lexical heuristics, entropy scores, and domain age reputation metrics.

• Integrated VirusTotal API for real-time hash lookups and combosquatting detection across benchmark threat datasets.

Practical Incident Investigation & Threat Hunting | *Wireshark, LetsDefend, BTLO, TryHackMe*

• Investigated multi-stage incident scenarios involving endpoint malware execution, C2 beaconing, and credential access.

• Extracted packet captures and memory artifacts using Wireshark; compiled structured IR reports with remediation steps.

CERTIFICATIONS & PROFESSIONAL TRAINING

CompTIA Security+ ce Certification — CompTIA (Active)
Offenso Certified Security Professional (OCSP) — Offenso Hackers Academy
Comprehensive Cybersecurity & SOC Training Program — Offenso Hackers Academy (Aug 2025)

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering | 2021 - 2025
UKF College of Engineering and Technology | APJ Abdul Kalam Technological University, Kollam

Coursework: Computer Networks, Operating Systems, Cryptography & Network Security, DBMS, Object-Oriented Design

Higher Secondary Education (10+2) – Computer Science | 2019
St. Mary's Higher Secondary School
